Assignment

Q-1: Why do we start learning a programming language with “Hello World!”

👉 every programmer start learning new language or technology they write their first program as printing Hello world on screen.

👉 its Traditionally going on, it's not compulsory to write hello world you can start with your choice.

👉 When our Hello world or first program runs successfully it means basic setup require to start leaning any

Technology or language is Done.

Q-2: How is the use of comments and how do you write comments in HTML?

👉 comments are used to understand code properly.

👉 we are writing comments to aware our self that in part we are currently working.

👉 By reading our comment any one can understand our code easily.

👉 we can add comment using below syntax

```
<!-- this is my comment-->
```

Q-3: What are elements,tags and attributes and the difference between them.

👉 tag is an identifier of which type of content

<> content </> opening tag and closing tag example p,h1,h2,etc..

</> self closing tag example <a/> ,

👉 opening tag , closing tag and content this three together is called as element.

👉 Attribute is the additional power of and tag. “src” and “alt” are the Attribute for img tag.

Q-4: Briefly explain what HTML entities are.

👉 **HTML** entities are reserved keyword in html. If we want to use that keyword in our content we have some special code or name to use them in our content.

👉 if we are using it directly it generate conflict between html syntax and content.

👉 Example:for 1 tab space in our content we are using

👉 More: < > & " © many more
