

Semantics

Assignment

Assignment

Q1: What are the new things introduced in HTML5!

👉 HTML5 has audio, video and canvas tags.

👉 HTML5 has some extra tags other than div and span.

Like header, footer, article, section, etc

👉 HTML5 also supports SEO.

Q2: What are semantic tags? Give a couple of examples.

👉 Semantic tags are tags that describe the type of content they have

Like, header, footer, main, nav, section, article, aside, details, mark, etc..

Q3: List some uses of semantic tags.

👉 Our code is more clean and understandable

👉 Helps in SEO

👉 Simplified styling
